Dear Gisa,

It has been a pleasure hearing from you because I was writing to you just today.

Yesterday my daughter Fabrizia performed an X-ray of her frontal and maxillar sinus due to the fact that, a few days ago, coming back from Milan by airplane, she experienced both, landing in Milan and back in Brindisi, a terrible headache. Remembering your suspect of frontal and maxillar chronic sinusitis, I decided to submit Fabrizia at this kind of instrumental exam and I have to say that you had right at 100%. An appointment with an ear, nose and throat specialist has been arranged for tomorrow but, both my wife and me have the intention to submit Fabrizia to your treatment also.

I didn't hear nothing from the gentleman that you treated against "C" hepatitis; I requested blood tests about 20 days ago but, until now, I don't have any news. When the blood tests will be ready, I will keep you promptly informed about these results.

I feel well as I hope about you and your family. No gas in my stomach anyway.

Thank you again for your kind help and I hope to meet you again in the near future.

Sincerely yours

Brindisi, 30/9/1999

01/10/99 P.S. : Yesterday I tried many times to transmitt you the letter above and I hope I will be more lucky this evening. Today I met the gentleman with "C" Hepatitis and I would like you to know that the blood samples regarding his liver seems good; at least they are 1/3 of the last exames (but not yet normal anyway). I advised him to perform another blood tests in two months not administrating any therapy and I will keep you informed about his results.
Fabrizia has been advised to take some pills and puff today (not antibiotics) but, coming back from the ear, nose and throat specialist, she expressed the will to meet you again for further treatments.

Many regards,

Giuseppe

Bem. Gisa Reinhold: Im Sommer 1999 habe ich den Professor und seine Tochter behandelt. Bei der Gelegenheit durfte ich einen seiner Patienten behandeln, der an chron. Hepatitis litt. Nach einer einzigen Behandlung waren die Blutwerte um 2/3 besser als zuvor (s. Brief letzter Absatz).
